
CUSTOMISABLE EQUIPMENT SOLUTIONS FOR SPECIALISED APPLICATIONS

SUPPORTING INDUSTRIAL AND WASTE APPLICATIONS

Combined with Mantrac's comprehensive services, your new, used or rental machine will cover the needs of every phase of your special project. These machines are designed to perform a range of functions, including bulk material handling, scrap operations, landfill operations and steel mill works.

Consistency is key to your success, and requires proper design, superior production control and long-term experience. We deliver on these in our partnerships with waste management companies.

PRODUCTIVITY VS. COST EFFICIENCY

Reliability, Productivity, Low Cost of Ownership

Poor performance during peak hours increases production delays, costs and bottlenecks. With skilled operators hard to find, these issues impact the bottom-line.

Mantrac equipment provides

- Consistent productivity round the clock.
- Loading units designed to offer high fuel efficiency and long economic life.
- Easy-to-use special configurations and work tools for every operation.

Recommended Mantrac machines

Material Handlers

- Cat

Telehandlers

- Cat HP
- Cat GC

Skid Steer Loaders

- Cat

Wheel Loaders

- Cat HP
- Cat GC
- SEM

Forklifts

- Cat
- HELI

LANDFILLS

Consistency, Design, Cost-effectiveness

Waste handling impacts machine life expectancy. As fleet renewals seem unaffordable with low public waste fees, site productivity and bottomline are impacted.

Mantrac's landfill solutions offer

- Purpose-built configuration, with long economic life and re-build options.
- Guaranteed productivity and fuel efficiency.
- Cat compaction system design, built to increase landfill lifetime.

Recommended Mantrac machines

Landfill Compactors
• Cat

Track-Type Tractors WH
• Cat HP
• Cat GC

Track Loaders WH
• Cat

Wheel Loaders
• Cat HP
• Cat GC
• SEM

LANDFILL DEVELOPMENT WORKS

Strength, Cost Efficiency

While machine requirements are the same, auxiliary and intermittent works can be tough on machine lifespan.

Mantrac helps enhance machine capabilities

- Reliable ripping and dozing capacity under the toughest soil conditions.
- Reliable hydraulic break-out force to excavate rocky soils.
- Lifecycle value and utility solutions for low cost of ownership.

Recommended Mantrac machines

Track-Type Tractors

- Cat HP
- Cat GC
- SEM

Track Excavators

- Cat HP
- Cat GC

Articulated Trucks

- Cat HP
- Cat GC

STEEL MILL APPLICATIONS

Safety, Productivity, High Efficiency, Low Operating Costs

Get the job done while keeping operators safe during scrap handling, slag removal for recycling and more. Our dedicated steel mill machines are designed to work in intense heat and safety features.

Mantrac solutions get it right the first time

- Dedicated steel mill cab on the inside, and specially mounted glass, steel HVAC cover on the outside.
- Fire-resistant EcoSafe hydraulic fluid is fully compatible with hydraulic system components.
- Multiple solutions to ensure your continued safety including EPP, CAT certified used machines, operator training etc.

TECHNOLOGY AND SUPPORT

Boost production. Reduce costs. Improve profitability.

Product Link/VisionLink

Hardware that captures on-the-go data about equipment usage. Hardware installation is included.

Cat App

Track the location and health of your equipment, order service and parts, and activate telematics devices directly from your mobile.

Cat Inspect

Capture and access inspection data of all your equipment on a mobile device.

Cat Grade

Help operators hit grading targets right on the money. This technology enables faster and fewer passes, resulting in 50% greater productivity.

Cat Detect

Improve job site safety by taking advantage of cameras, e-fence and advanced sensor systems.

Cat Payload

Get crucial information on any type of payload function; what got loaded where, how much went in each truck or hopper, and where it went from there.

MANTRAC 360 SOLUTIONS

Mantrac provides lifecycle support with custom coverage for your goals and objectives.

Machine Uptime Guarantee

Protect your operations from machine downtime. We offer courtesy loan-bridging machines during equipment service periods, so you keep running

Customer Value Agreements (CVA)

Mantrac shares data insights by monitoring thousands of machines, to help you achieve predictable output and profit.

Fuel Consumption Guarantee

If your machine consumes more than a defined level of fuel, Mantrac will reimburse the difference.

Equipment Protection Plans (EPP)

We offer specialised plans designed to cover your machine in case of unanticipated breakdowns and repairs.

Financing

Customisable payment plans to help expedite your purchase and get your equipment on the job faster.

The Mantrac Network

Mantrac has a large network and parts inventory, minimal time intervals for ordering, field servicing and repairs, and our own reconstruction facility.

THE MANTRAC BENEFIT: BUILDING PROFITABLE AND EFFICIENT OPERATIONS

Our goal is to help you achieve profitability in your industrial and waste management project, by providing you with:

- Purpose-built equipment and solutions
- Consistent productivity when you need it
- Cost-effective equipment with long economic life

Consulting

We consider your application requirements, total ownership costs and more, backed by 40 years of experience.

Wide range

Choices for short-term utility, lifecycle value or long-term performance. Built for all intensities and applications.

Customisation

Versatile attachments. Technology for visibility, on and off the job site. Tailored solutions for less downtime.

Acquisition

Reduce CAPEX with used or rental machines: like-new performance at a competitive price.

Training

Our Cat-certified experts train your team on machine operation to improve safety, fuel efficiency, productivity and profit.
